SKILL SUMMARY

- Frontend: React, Next.js (strong TypeScript skills), HTML5, CSS3, Tailwind CSS
- Backend: Node.js, Nest.js, Express, Flask, FastAPI, Pandas, Numpy, Scikit Learn
- Database: MongoDB, PostgreSQL, MySQL, Supabase, Google Firebase, Firestore
- DevOps: Docker, CI/CD, Vercel, Render
- Languages: JavaScript, TypeScript, Python, C/C++, R

WORK EXPERIENCE

Data Science Intern | The Developers Arena

Jun 2026 – Aug 2026 · Verify

- **Retail Demand Forecasting** - [View Project](#) - Built an end-to-end **retail demand forecasting solution** using Python, Pandas, Scikit-learn, and feature engineering on transaction data.
- Compared **Linear Regression, Random Forest, and Gradient Boosting**, selecting Random Forest with an **MAE of 2.32 units**.
- Deployed the trained model as a **Flask REST API** with an interactive dashboard and implemented automated testing with **8/8 API tests passing**.

Data Science Intern | The Skybrisk

May 2026 – Aug 2026 · Verify

- **Personalized Cinema Suggestion Engine** - [View Project](#) - Built a **content-based movie recommender** using the TMDB 5000 dataset, combining movie overviews, genres, keywords, and cast information.
- Preprocessed and transformed textual features using **TF-IDF/CountVectorizer** and calculated **cosine similarity** to identify the most relevant movie recommendations.
- Developed a `recommend()` function to return the **top 5 similar movies** and implemented an interactive **Streamlit interface** for user-friendly recommendations.

PROJECTS

Wavify - Full-Stack Music Streaming Platform · [\[View Project\]](#)

React, Node.js, Express, Ollama, OpenAPI, Tailwind CSS

- Built an **AI-powered API testing tool** that parses OpenAPI specifications and automatically generates comprehensive test cases using a **locally hosted Ollama LLM**.
- Developed a full-stack interface for **uploading OpenAPI YAML/JSON files, selecting endpoints, reviewing generated tests, and exporting tests** in formats such as Jest and Mocha.
- Implemented **schema validation, configurable test coverage levels, local-only AI processing, and automated API test generation** to reduce manual validation effort.

Wavify - Full-Stack Music Streaming Platform · [\[View Project\]](#)

React, FastAPI, SQLite, Zustand, Web Audio API, ytmusicapi, yt-dlp

- Built a local-first music streaming platform with React and FastAPI, integrating YouTube Music metadata and audio extraction with ytmusicapi and yt-dlp.
- Developed playlist CRUD, liked songs, recently played tracking, song search, queue management, and audio playback, backed by a SQLite database and RESTful APIs.
- Implemented Zustand/React Context state architecture, optimistic UI updates, and a real-time Web Audio API visualizer, with structured backend logging and API documentation through FastAPI/Swagger.

Pensieve - Full-Stack Developer Toolkit · [\[View Project\]](#)

Next.js, TypeScript, Firebase, Supabase, Groq API, TOTP

- Built a full-stack productivity toolkit with Next.js and TypeScript featuring TOTP authentication, AI Notepad, and Cloud Vault, backed by Firebase and Supabase.
- Integrated the Groq API for AI-powered text summarization and implemented REST APIs, QR-based authentication, document export, and Zustand state management.

CERTIFICATES

- **Introduction to MongoDB** — SimpliLearn · *Jun 2026*
- **Back-End Development and APIs** — freeCodeCamp · *May 2025*
- **Legacy JavaScript Algorithms & Data Structures** — freeCodeCamp · *May 2025*
- **Be10x AI Tools Workshop** — Be10x · *Feb 2026*
- **Microsoft Certified Foundation C#** — freeCodeCamp · *Feb 2024*
